

Hello Justin

i'm not gonna lie i used one of these methods on video just because its easy to me to understand , always I can go back and check. In this industry theres so many ways to a client requirement cant be to specific way. I couldnt let create user page to pop up it'll send me to index page I really I couldn't figure it out. I spend all night to figure that shit I couldn't I even didn't study for my midterm. I'm sorry for using other methods but thats what I can do I hope you'll understand with the struggle with codes. I didn't signed up for this course so I can cheat or use somebody else method I just used different method. In end of the day it'll do the requirement please be fair I spend so many hours not to get zero .
